PROFESSIONAL SUMMARY

Lead Mobile Engineer with **10+ years of experience** in designing, developing, and maintaining **scalable Flutter and Android applications**. Proven expertise in **technical leadership, system design, clean architecture, offline-first solutions, and production stability**. Strong experience in **mentoring teams, owning delivery timelines, coordinating with clients and stakeholders**, and ensuring high-quality releases. Adept at architecture **decisions, code reviews, performance optimization, and root cause analysis (RCA)** for critical production issues.

SKILLS

Core components

- Mobile Architecture & System Design
- Team Leadership & Mentorship
- Client & Stakeholder Communication
- Delivery Planning & Deadline Management
- Production Release & Incident Management
- Clean Architecture (MVVM, MVI)
- Offline-first & Caching Strategies
- Performance Optimization & Stability

Technical

- **Mobile:** Flutter (Dart), Flutter Web, Android (Kotlin, Java)
- **Architecture:** Clean Architecture, MVVM, MVP,
- **State Management:** Provider, Bloc (working experience)
- **Data:** SQLite, Room
- **Networking:** REST APIs, Retrofit, Error Handling
- **Async:** Coroutines, Multithreading
- **UI:** Material Design, Responsive Layouts
- **Tools:** Android Studio, Git, Firebase (FCM, Analytics, Firestore, Storage, Authentication, Cloud Functions)
- **CI/CD:** Code magic, GitHub Actions (basic)

PROFESSIONAL EXPERIENCE

Freelance App Developer — Independent Consultant

Dec 2025 – Present

Project: Temple Girl Kids – Devotional Audio Storytelling App

- Built a full cross-platform audio storytelling app for content creator Namrata Mohan (2M+ Instagram followers) featuring temple and mythology stories for children aged 3–10. Delivered on Android, iOS, and web using Flutter.
- Architected and developed the Flutter Web admin panel for content management, backed by Firebase Firestore, Firebase Storage, Firebase Authentication, and Firebase Analytics.
- Implemented server-side business logic and subscription workflows using Firebase Cloud Functions, enabling secure payment processing via Razorpay and automated content delivery.
- Built the marketing and subscription website (templegirl.com) with integrated audio preview, COPPA-compliant data handling, and App Store / Google Play deep links.
- Managed end-to-end delivery: requirement gathering, design, development, App Store / Play Store submissions, and post-launch support.

Project: Resonance e-Learning – Online Education Platform

- Developed a comprehensive e-learning application for Resonance Hyderabad, a competitive exam coaching institute, offering structured video classes, practice tests, and performance analytics for students.

- Delivered cross-platform Flutter app for Android and iOS, with chapter-wise and topic-wise video content, exam simulation with time constraints, and detailed progress reporting.
- Integrated seamless multi-device support (Android + iOS), enabling students to switch devices without losing progress, with 10,000+ downloads on the Play Store.

The Binary Search — Lead Software Engineer

Dec 2024 – Dec 2025

Project: My Kitchen (Food Delivery Application)

Geo-location-based food delivery and dine-in application supporting **multi-country configurations**.

- Led **architecture, development, and delivery** of Flutter.
- Responsible for **overall application architecture**, defining clean, modular, and scalable structures aligned with business requirements.
- **Actively involved in requirement discussions with clients and product teams**, translating business needs into technical solutions.
- Planned and **controlled delivery timelines**, sprint execution, and feature prioritization to meet project deadlines.
- **Mentored and guided developers**, conducted regular code reviews, and enforced coding standards and best practices.
- Owned **production deployments**, monitored post-release stability, and handled **critical production issues with RCA**.
- Improved app performance, API handling, and background task execution to enhance reliability and user experience.
- Leveraged **automation and AI-based tooling** to improve development efficiency and delivery timelines.

Sruta Digital Solutions Private Limited — Senior Software Engineer

Jan 2022 – Nov 2024

Project: Patasala – Parent & School Management Applications

School management ecosystem for **parents, staff, and administrators**.

Project: Student Bus Tracking Application (Native Android)

Real-time bus tracking system for parents to monitor student transportation.

- Played a key role in **designing and maintaining large-scale school management applications** using Flutter.
- Worked closely with **clients and internal stakeholders** to understand requirements and propose scalable technical designs.
- Designed reusable components and followed **clean architecture principles** to improve maintainability.
- Implemented dashboards, API integrations, and responsive UI with consistent performance.
- Actively handled **production incidents, debugging, and RCA**, ensuring high availability.
- Built **financial management dashboards** for fees and reports.
- Implemented **Live GPS tracking, face recognition-based staff attendance** using native Android

iGuru Portal Services Private Limited — Senior Software Developer

Aug 2018 – Jan 2022

Project: iGuru – Parent & Admin Management Application

Unified education platform supporting **parent, admin, and staff logins**.

Project: iGuru Prep – E-Learning Platform (JEE / Advanced)

E-learning platform for **JEE and advanced competitive exam preparation**.

- Developed and maintained **multiple production Android applications** using Java and Kotlin.
- **Migrated legacy applications from Java to Kotlin**, improving code quality and reducing crash rates.
- Designed and implemented features such as **live classes, online exams, push notifications, and tracking modules**.
- Conducted code reviews and **mentored junior developers**, helping them follow best practices.
- Built **multi-role login architecture** within a single application. **Payment gateway integrations** for fees and services.
- Implemented **real-time chat using Firebase, Zoom SDK** for live online classes.
- Designed **online and offline examination modules**. Implemented **UTC-based exam scheduling** for consistency across regions.

Blewsoft Technologies Private Limited — Software Engineer

Jan 2016 – Jan 2018

- Built Android applications for **finance, utilities, and media domains** from concept to deployment.
- Gained strong foundation in **Android fundamentals, REST APIs, and local data storage**.
- Delivered multiple stable releases and contributed to successful client deliveries.

EDUCATION

Bachelor of Technology (B.Tech) — Electronics & Communication Engineering

Madanapalle Institute of Technology & Science | **2014**

ACHIEVEMENTS

Best Employee Award (Twice)

Recognized for outstanding performance and contribution at **Blewsoft Technologies Private Limited**. and **iGuru Portal Services Private Limited**
